

# SERIS - PUBLIC SAFETY

**Swifter response to incidents of crime to make cities and communities safer, for greater peace of mind**

Designed as an essential nerve centre in the community, SERIS-Public Safety offers crime and counter-terrorism technology capabilities to enhance police operations, efficiency and response times during complex and time-critical situations.

## **SMARTER POLICING WITH INTEGRATED INFORMATION STREAMS**

Offering greater citizen safety and protection, SERIS-Public Safety was implemented to provide a robust and reliable round-the-clock solution coupled with dynamic computer-aided despatch capabilities to reduce casualty rate, damage and loss of personal property.

Fully-integrated, the system offers multiple communication configurations to support realtime wireless

multimedia transmission and data sharing. By providing quick and effective analysis, it improves the decision making of law enforcement investigators and analysts.

## **SOLVE & PREVENT CRIME IN REALTIME**

Police agencies are able to locate and track officers, equipment and resources, as well as monitor status reports and updates for greater operational efficiency at the crime scene.

In addition, the solution offers intelligent multi-agency interface with external bureaus for greater collaboration, data sharing and rapid follow-up action; particularly helpful in major emergency operations such as riots and disasters.

## **SOLUTION FEATURES**

- Rapid, accurate and strategic resource deployment
- Multi-agency interface with external homeland security agencies

With the aim to reduce crime rates and enable safer cities, SERIS-Public Safety boosts the operational effectiveness and efficiency of safety and surveillance agencies, facilitated by realtime communications, smart visualisation and dynamic data management tools.
