STRATEGIC PARTNERS:

A NEW PAY-PER-USE APPLICATION INTEGRATED WITH SMART GLASSES

Create a new world of work possibilities with the world's first augmented intelligence smart glasses platform-as-a-service.

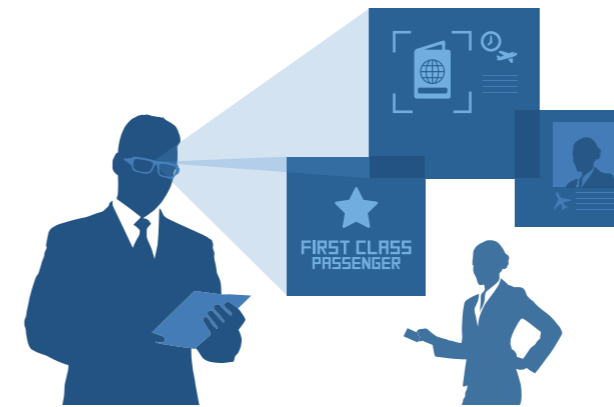

Embedded with biometric capabilities, it streamlines work processes, enabling automated and non-intrusive identification.

These applications boost enterprises productivity and enhance the public safety of citizens in the face of rising urbanisation.

Applications Include:

-  Hands-free barcode scanning
-  Real-time identification of person of interest
-  Remote dispatch and synchronised command
-  Real-time situational awareness with live streaming to the command centre
-  Enrolment automation to enhance efficient operations and workflows

Achieve up to **50%**
enhanced productivity

AVIATION

Enhance passenger experience:

- Seamless boarding gate verification for passengers within 15 minutes
- Faster identification of first-class cabin passengers' preferences
- Locate late or lost passengers within the airport
- Efficient retail experience at luxury or duty-free retail outlets

HEALTHCARE

Save more lives with real-time shared information:

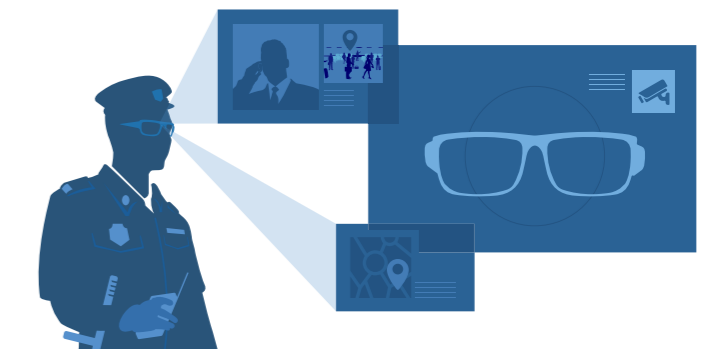

- Identify casualties/patients without the need of a physical ID
- Receive critical vital information such as blood group, known allergies and next-of-kin
- Integrate with Smart Ambulances to consolidate real-time patients data and send it to hospitals before arrival

LOGISTICS/MANUFACTURING

Save time on operational tasks:

- Enable on-the-job training for workers in troubleshooting and fixing equipment
- Present task information to workers directly to their field of vision
- Improve workers' safety with hands-free barcode scanning

PUBLIC SAFETY AGENCIES

Smart and swift security response:

- Identity verification of person of interest as well as location tracking
- Intelligent guiding of enforcers to locate person of interest
- Reduce manpower with simplified workflow when performing enforcement
- Suspect identification in crowded places
